

# Contents

	<b>Page</b>
<b>Grass Plant Simulation in Real-Time Applications Using GPU</b> Radosław Bednarski, Bartłomiej Dągowski, Dominik Szajerman	7
<b>Creating an Advanced Combat System in an CRPG Game Based on Similarity of Symbols Drawn by the Player Using Neural Networks</b> Igor Budzyński, Damian Pęszor . . . . .	33
<b>Moving Object Detection on VGG Networks in Games with Moving Camera</b> Michał Domarecki, Dominik Szajerman . . . . .	53
<b>Extending OptaPlanner Solver with Implementation of Ruin&amp;Recreate Principle</b> Michał Dudkiewicz, Michał Karbowańczyk . . . . .	63
<b>Automated Escape Room Game Progress Monitoring and Moderating System</b> Tycjan Fortuna, Filip Andrzejewski, Małgorzata Komorowska, Wojciech Michałowski, Michał Karbowańczyk . . . . .	77
<b>Teaching Game Development in the Białystok Desert of the Game Industry: The Game Development Track</b> Krzysztof Gawryluk . . . . .	97
<b>Visual Consistency Assessment for a Series of Graphic Design Works: A Machine Learning Approach</b> Krzysztof Guzek, Maja Garkowska . . . . .	109
<b>Optimizing the GMRES Implementation for Solving Multiple Large-Scale Matrix Systems of Equations</b> Wojciech Jakieła, Bartosz Czernic-Gołowski, Korneliusz Dyszczyński . . . . .	125

<b>IF-THEN Rules in Searching Outliers</b> Marcin Kacprowicz, Monika Bartczak, Adam Niewiadomski . . .	137
<b>A System of Interaction with Non-Player Characters in a cRPG Game Based On Interpersonal Relationships</b> Krzysztof Kocot, Damian Pęszor . . . . .	147
<b>The Impact of Content and Composition of Procedural Environment Generation Elements on Player Satisfaction</b> Bartosz Krukowski, Aneta Wiśniewska, Rafał Szrajber . . . . .	169
<b>First Edition of Summative Module for Network Infrastructure and Applications: The Ideas, the Reality and the Conclusions</b> Marcin Kwapisz, Michał Karbowańczyk, Mateusz Smoliński . . .	179
<b>Steering Behaviors for Vehicle Movement in Racing Computer Games</b> Adrian Majzer, Dominik Szajerman . . . . .	193
<b>Quantum Simulation of the Excited State Decay in Two Dimensions</b> Marcin Ostrowski . . . . .	207
<b>Enemy Machine Learning-Based System in a cRPG-based Game</b> Mateusz Płonka, Damian Pęszor . . . . .	225
<b>Team Project: Łódka Wolontariatu - A Successful Example of University and Enterprise Cooperation</b> Mateusz Smoliński, Krzysztof Brzeziński, Marcin Kwapisz, Michał Karbowańczyk, Tomasz Ciszewski, Szymon Depcik, Adam Kapuściński, Daniel Modrzejewski, Paulina Papiernik, Damian Szczeciński, Kamila Topolska, Adrian Wojtasik, Radosław Zyzik	241
<b>A Method for Player Character Navigation in Three-Dimensional Computer Games</b> Dominik Szajerman, Jakub Łapiński, Radosław Bednarski . . . .	253
<b>Enhancing Video Game Experience through Microexpression Recognition: A Deep Learning Approach</b> Julia Szymańska, Przemysław Zdrzalik, Witold Pietrzak, Mariusz Postół . . . . .	271

*CONTENTS*

**Retopology of Three-Dimensional Models Using Hierarchical Clustering**

Aleksandra Szymczak, Damian Pęszor . . . . . 281

**Deep Learning for Saliency Map Generation**

Przemysław Zdrzałik, Julia Szymańska, Witold Pietrzak, Jędrzej Mońko . . . . . 293
